

The energy policy of the Asian Development Bank (ADB) focuses on maximizing energy access, promoting energy efficiency and renewable energy, and promoting improved governance and capacity in the energy sector to strengthen the capacity of developing member countries to meet critical energy needs. This publication seeks to further ADB's efforts to promote knowledge sharing among stakeholders and help identify the policy, regulatory, and legal barriers to energy access; design and implement effective frameworks; and develop strategies to scale up energy access for all. This publication also seeks to serve as a reference for stakeholders and menu of options for further action.

The TAB Book of Arduino Projects: 36 Things to Make with Shields and Proto Shields, The Little Book of String Theory (Science Essentials), Snakes and Ladders (Yellow Bananas), Secrets of Art and Nature, Nuts, Bolts and Magnetrons: A Practical Guide for Industrial Marketers, You Can Be a Woman Video Game Producer,
