

This series uses a variety of artifacts and clear, simple text to explore a wide range of subjects in the real world. Each volume is lavishly illustrated, featuring some of the most respected and beloved masterpieces in the art world, as well as less known but equally exciting material that has unique relevance to the subject of the book. From faces to figures, food, and houses, this new series combines the most fascinating forms of artistic representation with text that is informative, illuminating, and guaranteed to spark young readers interest in the arts and in the real-life events that nourish the creative spirit.

Bayern 2016, Unknown Death, tinyAVR Microcontroller Projects for the Evil Genius, Boundary Element Formulations for 3D Radiation and Scattering Problems (Topics in Engineering), Environment Exposure to Pollutants (Advances in Experimental Medicine and Biology / Neuroscience), Los Alimentos / The Food (Primeros Lectores / First Readers) (Spanish Edition), Prosody: Models and Measurements (Springer Series in Language and Communication),
