

# Christmas Tree Space Sails. Volume 44.

Herein Volume 44 we continue from Volume 43 to modify the Light String Christmas Tree Sail formula for gamma by including a mechanism for vectorised higgs field(s) or other arbitrary scalar fields. A rather lengthy operator is inserted in several hundred locations within the formula for gamma for which the operator takes into account the possibilities of vectorised scalar fields artificially manipulated at or near the location of a light-sail spacecraft taking on a non-zero vector curls, a non-zero divergences, a non-zero Laplacians, and/or a non-zero gradients. The operator is a dimensionless multiplicative factor and is not further specified in terms of context specific locations into which the operator is inserted into the lengthy formula for gamma. However, context specificity is assumed none-the-less in all locations in which the operator is present. Enjoy the read! Jim
